WHY EXCELLENCIA SHOULD BE THE FIRST CHOICE FOR YOUR WARD?

- The vision, planning, Implementation and execution of academic schedules is done under the guidance of Team Excellencia, led by Founder Director Mr. Venkat Muriki (who has been in the competitive field for more than 20 years, worked across India) with an intention to provide the student an all-round development in tune with the latest needs of the competitive world. The curriculum is blended with both academic and personality development oriented sessions.
- Prior to admission, parents are encouraged to meet existing students and their parents for correct feedback. Parents then interact with the teaching staff where they get clarifications for their queries. The interaction of parents with staff during faculty introduction session is mandatory before admission. We are the only group of institutions which introduce the faculty to parents before the start of academic session.
- During the admission process the parents are thoroughly informed about the programme, methodologies adopted by team Excellencia, through a series of seminars conducted regularly. Even during the admission process the child is helped to overcome the challenges faced during the preparation of their respective board examinations.
- Though sections are formed on the basis of the marks based on the board examination. The same set of faculty will be teaching all the sections; even in case of minor shuffling the students don't face much of hindrance. Every student is given an opportunity to learn and perform, because we believe that students attitude towards studies can trigger at any point of time.
- Class strength with a maximum 50 of students which facilitates one to one interaction. Each section is monitored and mentored by senior faculty, whose interaction with students at regular intervals helps the child to overcome the initial challenges they face while transiting from school to college.
- Teaching and study session monitored by the same eminent senior faculty, who teaches the core subject in the classroom, to ensure the effectiveness of working sessions. PTMs held bimonthly will increase the interactions between parents and faculty to coordinate and discuss child's progress.
- Online examinations and weekly tests on the syllabus completed. Online tests are conducted regularly covering all competitive exam patterns. Further Constant interaction with faculty through social media during non working hours to clear the doubts instantly.
- Reception and retention power of all students may not be the same. Remedial classes are conducted, after class sessions for students who understand and group and grasp the subject slowly. Utmost care is taken towards their progress. Performance of the students is constantly reviewed, their strengths are made stronger, and the student is made to work more on weak areas till they master it. Motivational sessions by experts in the field will further help the students to overcome their weakness and be mentally prepared for the future.
- Parent concerns Whatsapp or any other social media is immediately addressed and acted upon. 24 X 7 Accessibility of CENTER HEAD/DEAN/DIRECTOR through sms/Whatsapp/mail will help in resolving concerns that parents may have.
- Thorough error analysis of JEE – Mains/ Advanced exam of every week. Regular REVIEW session by faculty, center head and Dean after the examination is over helps the students to know their strengths and weakness. Students in this review sessions also come to know about the challenges they face in the three hour examination and time management skills.
- Well ventilated spacious classrooms with AC. Digital set up for audio visual classes, Indoor Sports everyday for 30 minutes. Meditation sessions at regular interval.
